Streetlink

StreetLink is a platform that connects people who sleep outside or in other shelters because they have no home (rough sleeping) to local support.

You can use Streetlink to:

- Send an alert about someone who is sleeping or preparing to sleep rough to get support from a local outreach team
- Find local help and support using the Homeless Link directory.

> StreetLink alerts are for people who are sleeping rough or preparing to sleep rough and are over 18.
