

WiFi Spark patient entertainment

WiFi Spark provide bedside entertainment systems for hospital patients. You can access TV, radio, internet and telephone services from your hospital bed during your stay in hospital.

There are 2 types of system in use in hospitals, touch screen or remote control systems. There is a charge for some of the entertainment options. Some services are free. They aim to provide this service for free by 2024.

You can bring your own device and use it in hospital for free. You can use Spark Media to connect your own device.

If you choose to pay for an entertainment package you can pay by

- Google or Apple Pay
- PayPal
- Direct debit or credit card

WiFi Spark was previously known as Hospedia.
